

Overview

For my final project, I am going to build a website for the panoramic software "Look VR", to introduce the features /the images that "Look VR" can bring to whoever is in the VR industry/ Camera productions/ Film productions.

Technical notes

- Two-pages (but I don't know how to make BLOG page...the owner wants to make a blog page so that owner and users can communicate...)

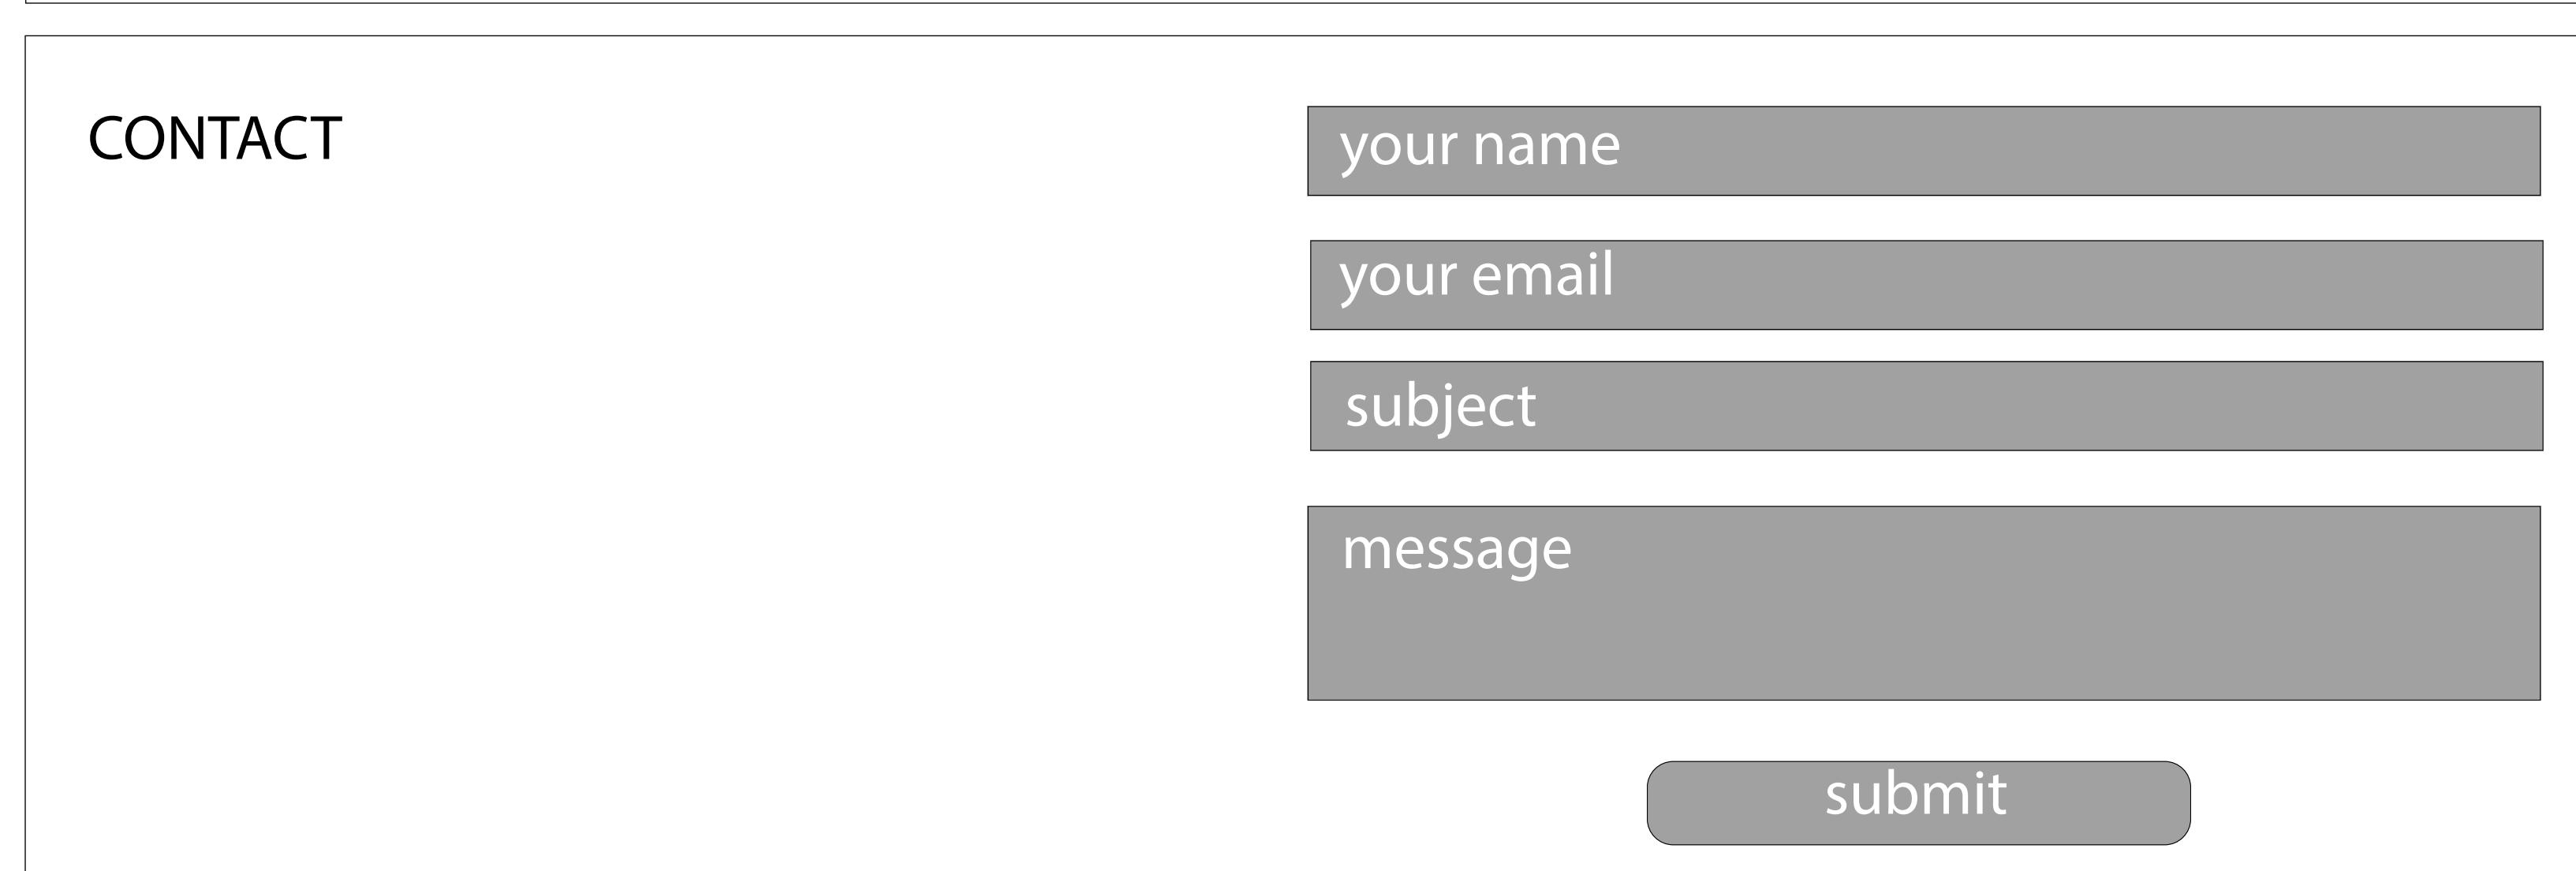

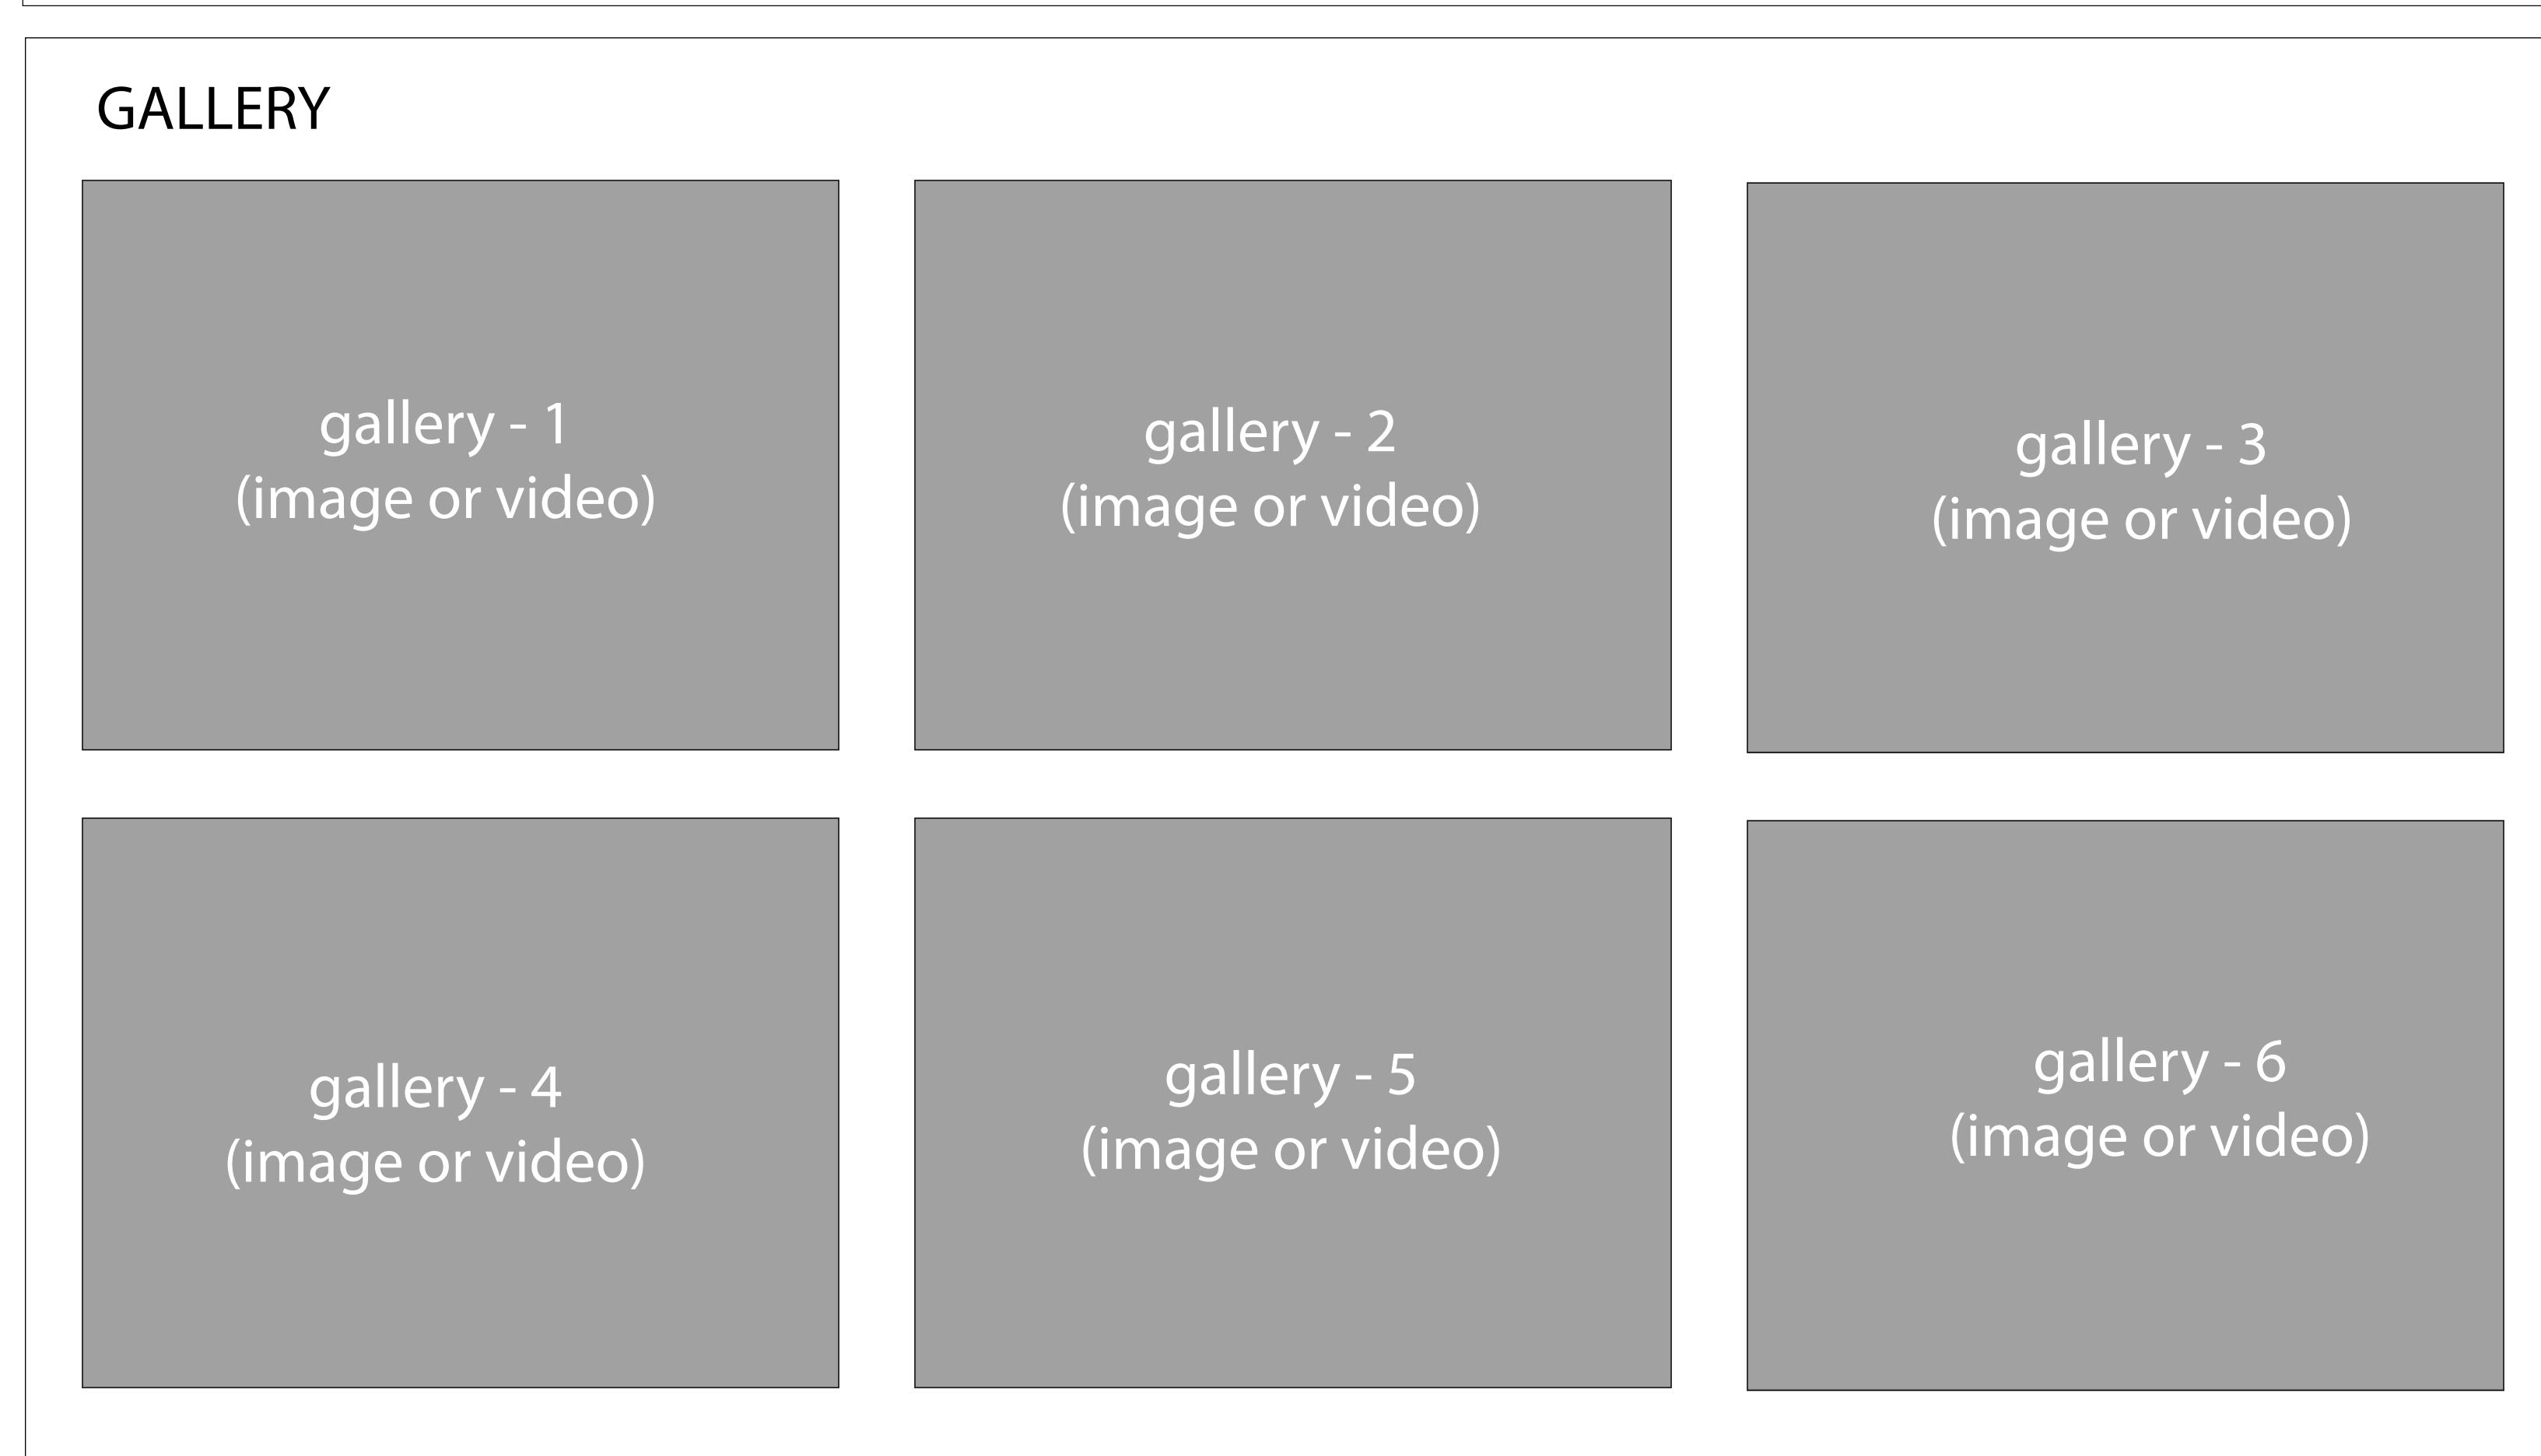

Functionally:

- header remains fixed
- when hovering "support", "blog" menu will slide down (---> jQuery)

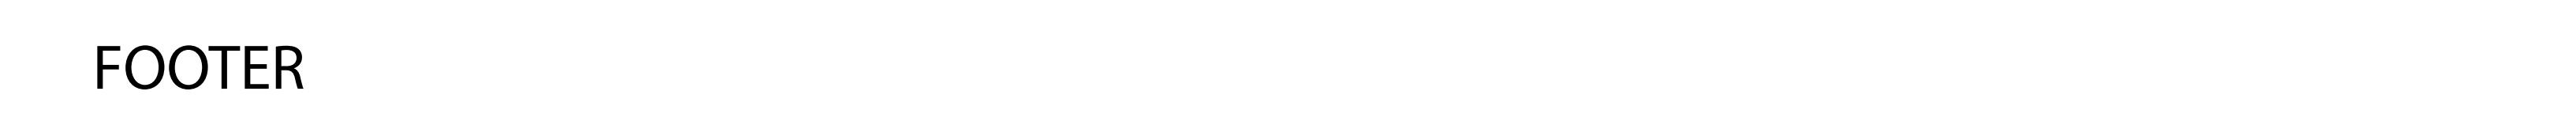

Functionally:

- automatic slides / navigation slides (---> jQuery)

Functionally:

- By clicking on each gallery, the image/video will be zoom-in (or enlarged) so that the user can see them comfortably. (---> jQuery)

Functionally:

- By clicking "submit" button, the message should be sent to Look VR. (I don't know how to make it possible....)

Functionally:

- By clicking "arrow", it can slide up to the top page.
